

January 2019

Dear Legislator,

First and foremost, thank you for your work on behalf of Indiana. As a citizen of West Central Indiana who are invested in its future, we follow the work of the Indiana General Assembly and understand the tough decisions you must make during every session.

**As a member of the Terre Haute City Council, I would like to personally express my strong support for legislation which advances the development of a casino in Terre Haute and Vigo County.** This is a unique opportunity for our region to enjoy the significant investment, tourism, tax and employment benefits that gaming has delivered to other regions of the state. Additionally, our position as a border city along a major interstate makes it an ideal location for the State to nurture new economic development and growth for West Central Indiana.

The economic development and tax revenues that gaming has brought to other communities throughout Indiana is something which would be particularly beneficial to the citizens of West Central Indiana. From developing new infrastructure to promoting quality of life and supporting public education, it draws visitors from outside the region, giving communities the ability to grow, thrive and compete.

Support of bringing a casino to Terre Haute and Vigo County is strong. On the website [terrehauteisallin.com](http://terrehauteisallin.com) there is a list of over 500 business leaders and individuals from the community who have also pledged their strong support of bringing a casino to West Central Indiana.

Therefore, I encourage the Indiana General Assembly and Governor Eric Holcomb to thoughtfully and expeditiously consider proposals with the knowledge that it has our strong and unequivocal support.

Sincerely,
